

# Success Story

Name Marsha Gordon

Wow! The way I feel today is so much different than when I first came to Leading Edge. I have always been very active and health conscious but years of travel and stress had finally taken their toll. My shoulders and neck were so tense that I was in constant discomfort and unable to find a position to sleep that worked. So, after visiting my doctor and simultaneously hearing about Mike Ryan from a friend, I came in for an assessment. The robotic approach was amazing and the professionalism + knowledge of Mike, Evelyn + Kam worked! I was amazed to compare the before and after. I honestly thought my shoulders would always be tense and tight... I have felt no tension in months. We also began work on my lower back which has been pain free for a while now, something I had determined would always follow my active lifestyle. So who should come to Leading Edge? Everyone! We don't wait to fix our automobiles until they are broken, we tune them up regularly. We should do the same with our bodies. Higher performance, strength, flexibility and a great night's sleep... all mine since coming to LE. Mike is such an expert... we should all feel this way. Thanks so much!
