

Central Florida Foot and Ankle Center, LLC

YOUR INSURANCE MAY COVER A NEW PAIR OF CUSTOM ORTHOTICS!

Custom Orthotics are specifically designed to support and comfort your feet. They are manufactured for you and you only. Prescription orthotics are made to follow the contours of your feet and to flow with the way you move. Custom Orthotics are prescribed after your podiatrist has fully evaluated your feet, ankles, and legs.

Prescription orthotics are divided into two categories:

- Functional orthotics are designed to control abnormal motion. They may be used to treat foot pain caused by abnormal motion; they can also be used to treat injuries such as shin splints or tendinitis. Functional orthotics are usually crafted of a semi-rigid material such as plastic or graphite.
- Accommodative orthotics are softer and meant to provide additional cushioning and support. They can be used to treat diabetic foot ulcers, painful calluses on the bottom of the foot, and other uncomfortable conditions.

"I had heel pain for 2 months and the pain was crippling and I would dread working the next day. We tried several techniques and nothing worked. So we decided to use orthotics and they definitely helped. Get the orthotics they will make the pain go away."

"Dr. Wellens is the best. She listens and takes action. I can finally walk without pain. What a blessing. "

"The staff and Dr. Jaramillo were so kind, friendly, and efficient during my first visit there. I finally know what's wrong with my feet. Thanks so much to the Medical Assistant, Maria that took my X-rays and explained to me about the orthotics to help me with my flat feet, arthritis, and plantar fasciitis. "
